

Learn Ga & Twi course content

There are different levels of study on our Ghanaian language courses, below is a preview of what to expect on the various courses.

Beginners Level 1

This is the first level of our Ghanaian language courses, and the most important stage of your learning journey. At this level, you learn the correct pronunciation of the letters; this is key to pronouncing words accurately like a local. We also teach you the unique sounds/pronunciation of digraphs and triagraphs (2-3 letter combinations). This level of learning teaches you to master some survival phrases and also builds your vocabulary.

Beginners Level 2

This level of our language courses builds on knowledge acquired from level 1 of your studies. Here we aim to help you be able to hold conversations by improving your listening and hearing skills. At this level, you get in-depth knowledge and understanding of the structure and grammar of the spoken language. By the end of this level, you should have all the tools you need to be a confident Ga or Twi speaker.

Intermediate

This is the level of learning where we drop our pens/pencils and notebooks. At this level, the lessons are 100% conversational on different topical issues. The lessons are going to be 60-70% in the particular language of study.
